

**BSS MAINTENANCE
SERVICE**

What exactly happen after fire incident?

We don't get second chances in the fight against fire. Nor is it possible to foresee when and where a fire may break out. That is why it is necessary for the fire safety devices at your premises must be ready to action and work at its best possibly when the time comes.

The Current Situation is at many premises' products are being installed but not being maintained. Many consumers want to maintain the fire safety equipment on their premises, but cannot locate professional to manage and operate the equipment. This forces customers to resort to maintenance by unskilled vendors

**How BSS Tech
can help you
to maintain
your existing
fire safety
system
and
equipment?**
