

Fire Extinguishers

A fire extinguisher is an active fire protection device used to extinguish or control small fires, often in emergency situations. It is not intended for use on an out-of-control fire, such as one which has reached the ceiling, endangers the user (i.e., no escape route, smoke, explosion hazard, etc.), or otherwise requires the expertise of a fire department. Typically, a fire extinguisher consists of a hand-held cylindrical pressure vessel containing an agent which can be discharged to extinguish a fire. Fire extinguishers manufactured with non-cylindrical pressure vessels also exist, but are less common.

Types of Fire Extinguishers:-

MAP (ABC Range)

MAP (Mono Ammonium Phosphate) range of ABC extinguishers are effective against Class A, B and C fires as well as Electrical fires. Easy to use, as it has a safety seal which can be broken in seconds. Having a pressure gauge, which shows the readiness of the fire extinguisher. The squeeze grip Lever mechanism allows the user to control the discharge and optimise use of the extinguisher. ISI Marked

Foam Based

Foam Fire Extinguishers are useful for Class 'A' & Class 'B' fires involving flammable liquids such as Paints, Solvents and fats like Grease and Oils. These Foam Extinguishers kill fire by cutting off the supply of atmospheric oxygen into the burning surface and thus cooling down it.

CO2 Range

CO2 extinguishers are the perfect weapon against large, hard to fight Class B and C fires. CO2 extinguishers offer higher storage capacity than regular sized CO2 extinguishers. The squeeze grip activation feature ensures that the extinguisher can be activated rapidly in an emergency.

Clean Agent Range

Clean agent is the cleanest & powerful fire extinguisher. It works on all classes of fire, as well is safe to use on sensitive equipments like computers, servers, printers, fax machine & other electronic equipments & leaves no residue. There is no need of cleanliness . after extinguish the fire. ISI MARKED

Kitchen (Class F Fire)

Kitchen Fire Extinguishers are made up Smooth finished Stainless Steel bodies and designed specially to fight against some of the toughest fires such as hot grease, cooking oil and fat fires in kitchen & food preparation areas. Kitchen Fire Extinguishers have the ability to maintain the foamy layer enough to allow complete cooling.
