

# Total Flooding System

The FM-200/Novect1230 Total Flooding Fire Suppression System is an engineered system utilizing a fixed nozzle agent distribution network. The system is designed and installed in accordance with the National Fire Protection Association (NFPA) Standard 2001, "Clean Agent Fire Extinguishing Systems." When properly designed, the FM-200 system can suppress a surface burning fire in Class A, B, and C hazards.

The firefighting ability of the FM-200 system is achieved through 80% heat absorption and 20% direct chemical means (action of the fluorine radical on the chain reaction of a flame).

## Features:-

Early Stage fire Detection
Extinguish fire within 10 secs
No Post Fire Damage
Works Automatically & Manually
Minimum Downtime
Easy to Install
Electronics Friendly
Underwriters Laboratories (UL)
No Clean-up Required After Discharge
24x7 Protection
Ozone, Environment-Friendly
Works on all Classes of Fire

## Applications

1. Bank Vaults
2. Telephone Exchanges
3. Flammable Liquid Storage
4. Libraries
5. Electronic Data Processing
6. Test Laboratories
